

Regalia

An alliance was formed between teachers and students from the various states of South Africa with students from Kerala as a part of a captivating cultural exchange programme. The event featured students from our institute showcasing their artistic talents while the team from South Africa proudly presented their diverse cultural skills at our college. The main aim of this event was to foster a meaningful exchange of traditions and customs between the two countries.

The cultural exchange was followed by a meaningful discussion based on education and technology. A fruitful transaction of ideas and valuable insights was made. All these discussions and sharing of valuable insights and knowledge from their respective backgrounds contributed to a broader perspective on education and technology practices between South Africa and India.
